

PARTNER	ECAM Brussels Engineering School
PARTNER'S NAME IN NATIONAL LANGUAGE	ECAM
WEBSITE	www.ecam.be
BRIEF DESCRIPTION OF THE PARTNER	<p>ECAM is a College of Engineering, training Masters in Industrial Sciences during a 5-year study cycle. Founded more than 100 years ago, we have around 1000 students and 50 academics. We are located in a university campus, which makes the immediate environment particularly attractive. Our graduates find high-level jobs in various fields of activities since we organise the 6 following streams:</p> <ul style="list-style-type: none"> - Electromechanical Engineering, - Automation - Construction - Surveying - Computer Science and IT - Electronics <p>Thanks to narrow relationships with the Industry our students can find internships easily. Those 6-week internships are organised twice in the curriculum, in the 3rd year and in the 5th year.</p> <p>We also invite our students to participate to various programmes and conferences, in Belgium and abroad (Euroweek is a very good example in that matter). We are certain they can acquire more skills when confronted with people coming from various origins. Those real-life situations will help them face professional issues they will encounter after their graduation.</p> <p>At the moment 30% of our students are sent to foreign Universities through international programmes, mainly Erasmus. We have partners all over Europe (Spain, Germany, Lithuania and others) and also in the USA and in Qatar. We strongly encourage the mobility of our future engineers as we are sure it offers them more chances to get better jobs.</p> <p>Our perpetual commitment to excellence goes hand in hand with our non-official motto: "Be serious without taking yourself seriously".</p>
LANGUAGE OF INSTRUCTION	French + some courses in English in Master years
